

Mountaintop Experiences

To describe something as a “mountaintop experience” is to say that it was a very significant, possibly even life-changing event. There were characters in the Bible who had experiences like that — on top of real mountains — and the events were so important they were recorded in Scripture. From the Bible references below, unscramble the names of the mountains and the names of the Bible characters. Then follow the paths up the mountain to match the person with his mountaintop where that unforgettable experience took place.
